#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 29 August 2003.
- 2a) This action is **FINAL**.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) Claim(s) 1-6, 21 and 25 is/are pending in the application.
  - 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) Claim(s) \_\_\_\_\_ is/are allowed.
- 6) Claim(s) 1-6, 21 and 25 is/are rejected.
- 7) Claim(s) \_\_\_\_\_ is/are objected to.
- 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on \_\_\_\_\_ is/are: a) accepted or b) objected to by the Examiner.
 

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. §§ 119 and 120

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-2 and 21 are rejected under 35 U.S.C. 102(e) as being anticipated by VAN BOCKEL (6,159,156).

As to claims 1-2 and 21, VAN BOCKEL (Figs. 2-3, 5) discloses sensor 10 attached to an outer surface of stent-graft combination 22 of graft 23 and stent 24a/24b to measure a pressure in an aneurysmal sac.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-6 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over VAN BOCKEL (6,159,156) in view of CIMOCHOWSKI (5,967,986).

As to claims 3-4, VAN BOCKEL discloses pressure sensor 10 mounted on the outer surface of stent-graft 22 but does not expressly disclose in detail how sensor 10 is attached to stent-graft 22 as recited in the claims. CIMOCHOWSKI discloses biosensor/pressure sensor 220 fixed to an outer surface of stent 222 by adhesive 228 through hole/opening 224 (Fig. 19; column 22, lines 53-56). As defined by the reference, an endoluminal implant includes a stent/stent-graft (abstract, lines 9-13; column 4, lines 21-22). CIMOCHOWSKI (Fig. 19) shows explicitly stent 222 as an endoluminal implant. However, according to the reference, the invention in the reference also includes stent-graft and it appears that there is no difference between attaching a sensor to a stent or a stent-graft. In view of CIMOCHOWSKI, it would have been obvious to one of ordinary skill in the art at the time the invention was made to mount the VAN BOCKEL pressure sensor by adhesive as taught by CIMOCHOWSKI, because using an adhesive to attach a sensor to a graft/stent or stent-graft is well known.

As to claims 5-6, CIMOCHOWSKI also discloses that the endoluminal implant can be a self-expanding stent-graft (column 25, lines 41-54) and also can be assisted by balloon (column 25, lines 54-58). In view of CIMOCHOWSKI, it would have been obvious to one of ordinary skill in the art at the time the invention was made to make stent-graft 22 self-expandable or balloon-expandable.

As to claim 25, VAN BOCKEL and CIMOCHOWSKI disclose substantially all the claimed limitations, except for the sensor is mounted in a hole through the graft. It would have been quite within level of an ordinary skill in the art to mount the sensor as claimed as this mounting of the sensor is just another choice of design.

#### ***Response to Amendment***

The amendment entered on 08/09/2003 under 37 CFR 1.131 has been carefully considered but is moot in view of above new grounds of rejections.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
